HIMANSHU KUMAR GUPTA

DATA ANALYST

93044himanshu@gmail.com | +91-9304436581 | LinkedIn: Himanshu_Gupta21 | GitHub: Himanshu_Gupta21

PROFESSIONAL SUMMARY

MCA student with hands-on experience in data analysis and a Data Analyst internship at Bold Analytics. Skilled in Python, Excel, SQL/MySQL, Pandas, NumPy, Power BI, Tableau, data visualization and exploratory data analysis. Strong analytical and problem-solving skills with good attention to detail, communication and teamwork skills. Experienced in collecting, cleaning and analyzing datasets, identifying trends, patterns and key performance metrics, and translating data into actionable insights and data-driven recommendations.

PROFESSIONAL EXPERIENCE

Bold Analytics | Data Analyst Intern | Apr 2026 – Jun 2026

- Collected, cleaned and analyzed datasets under the guidance of a Project Manager to generate actionable insights, demonstrating strong analytical skills, professionalism and dedication.
- Identified trends, patterns and key performance metrics, and supported the team in interpreting business data for decision-making, strengthening practical analytical problem-solving skills.
- Assisted in preparing reports, dashboards and data-driven recommendations, collaborating with the team on real-world data analysis projects with good attention to detail, communication and teamwork.

TECHNICAL SKILLS

Programming & Analysis: Python, R, SQL, Excel, C++, Java
Data Analytics: Pandas, NumPy, Exploratory Data Analysis (EDA), Data Preprocessing, Data Cleaning, Data Visualization, Reporting & Dashboards, Trend & KPI Analysis, Data-Driven Recommendations, Statistics
Visualization & BI: Power BI, Tableau, Matplotlib, Seaborn
Databases: MySQL, MongoDB
Tools: Jupyter, VS Code, GitHub
Core: Analytical & Problem-Solving Skills, Attention to Detail, Communication, Teamwork, Collaboration, Adaptability

PROJECTS

Customer Shopping Behaviour Analysis | *Sep 2026*

- Analyzed 3,900 customer records using **Python**, **Pandas**, **NumPy** and **Jupyter Notebook** to perform **data cleaning**, **exploratory data analysis (EDA)**, **feature engineering** and **customer segmentation**.
- **Standardized data** and created **analytical features** including age groups and **purchase-frequency metrics** to support revenue, product, subscription, discount and customer-behaviour analysis.
- Loaded and analyzed the cleaned dataset in **SQL Server** using **SQLAlchemy** and **pyodbc**; developed **10 business-focused SQL queries** using **aggregations**, **subqueries**, **CASE statements** and **window functions**.
- Built an interactive **Power BI** dashboard with **slicers** and visualizations for revenue, sales, categories, subscriptions, shipping preferences and age-group performance; documented the project on **GitHub**.
- Technologies: **Python**, **Pandas**, **NumPy**, **Jupyter Notebook**, **SQL**, **SQL** Server, **SSMS**, **SQL**Alchemy, **pyodbc**, **Power BI**, **GitHub**, **CSV**.

Mental Health Text Classification & NLP Analysis | *Sep 2026*

- Analyzed 53,044 records and cleaned 52,681 usable statements using **Python**, **Pandas**, **NumPy** and **Jupyter Notebook**; performed **NLP** preprocessing, **EDA** and text feature engineering.
- Applied **NLTK** preprocessing with stopword removal and **WordNet lemmatization**; used **TF-IDF** with 10,000 unigram/bigram features and trained **Logistic Regression** and **Linear SVM** models using **Scikit-learn**.
- Loaded the cleaned data into **SQL Server** using **SQLAlchemy** and **pyodbc**; analyzed category distribution, text length, average text metrics and longest statements using **SQL**.
- Built an interactive **Tableau** dashboard with filters and 8 visualizations; documented the project on **GitHub**. Technologies: **Python**, **Pandas**, **NumPy**, **Jupyter Notebook**, **NLTK**, **Matplotlib**, **Seaborn**, **Scikit-learn**, **TF-IDF**, **Logistic Regression**, **Linear SVM**, **SQL**, **SQL Server**, **SQLAlchemy**, **pyodbc**, **Tableau**, **GitHub**, **CSV**.

Vendor Performance Analysis | *Sep 2026*

- Analyzed **123 vendors** across sales, purchases, profitability, freight costs, inventory movement and product performance using **Python**, **Pandas**, **NumPy** and **Jupyter Notebook**.
- Integrated sales, purchasing, pricing, invoice and inventory data using **SQL ETL**, performed **data validation** and built a vendor-level analytical dataset in **SQL Server**; calculated vendor sales, purchase, gross profit, profit margin, freight and inventory metrics.
- Performed **EDA**, **correlation analysis**, **linear regression**, **Welch's t-tests** and **95% confidence-interval analysis** to evaluate vendor performance, sales relationships, profitability and freight impact.
- Built an interactive **Power BI** dashboard with KPI cards, top-vendor analysis, sales trends, sales contribution, scatter analysis and dynamic **Vendor**, **Brand** and **Classification** filters; documented the project on **GitHub**.
- Technologies: **Python**, **Pandas**, **NumPy**, **Jupyter Notebook**, **SQL**, **SQL** Server, **SSMS**, **SQL**Alchemy, **pyodbc**, **Power BI**, **GitHub**, **CSV**.

CERTIFICATIONS

- Python for Data Analytics — DeepLearning.AI / Coursera | Aug 2025
- Web Designing and Development — E-Max India | Dec 2023
- Python with Machine Learning and Data Visualization — Lifetech Software | Feb 2023
- Alpha: DSA with Java — Apna College | Dec 2023

ACHIEVEMENTS

- Completed DSA course with 92% accuracy.

• Received an Award of Appreciation from Shraddha Khapra.

EDUCATION

Lovely Professional University, Punjab, India | Aug 2024 – Present
Master of Computer Applications (MCA) | CGPA: 7.53

Dr. Shyama Prasad Mukherji University, Ranchi, Jharkhand | Sep 2021 – Jul 2024
Bachelor in Information Technology | 74.4%

Gossner College, Ranchi, Jharkhand | Apr 2019 – Mar 2021
Intermediate | 63%
